

SBL'S FOCUS

SBL, set up a high tech manufacturing unit of international standards (conforms to GMP) in collaboration with Boiron laboratory of France in 1983. The three fully automated, computerized and centrally air conditioned plants are manufacturing basic and finished homoeopathic products of utmost precision and providing reliable medicines at affordable prices.

The superiority of SBL products derives from the company's corporate philosophy : NON-NEGOTIABLE FOCUS ON QUALITY. The quality control labs and R&D, the nerve centers of entire manufacturing process are equipped with latest equipment. **The SBL is the first manufacturer whose R&D Labs are recognized by the Ministry of Science and Technology, Govt. of India.**

The emphasis on the quality, efficacy, and safety of products extend all the way from sourcing of authentic raw materials through processing, in-process testing, bottling and packing.

The tradition of observing global benchmarks has been maintained and indeed enhanced. SBL is today **the first homoeopathic company in India with ISO 9001:2000 certification awarded by the TUV NORD CERT Certification Body of RWTUV Anlagentechnik GmbH of Germany.** Likewise SBL is the only homoeopathic company in India with separate microbiological laboratories where all liquid formulations are tested for no adverse bacterial development to which liquid formulations are usually prone to.

The strength of our manufacturing is further reflected in our ophthalmic unit, which is one of its kind with state-of-art manufacturing facilities.

At SBL there is a constant endeavor for evolving new innovations, new technologies year after year. SBL is the only company to acquire HPTLC (High Performance Thin Layer Chromatography) system, an invaluable quality assessment tool. All the three manufacturing units of SBL are GMP Certified under schedule M1.

SBL's product range includes more than 400 varieties of Mother Tinctures, more than 1000 dilutions in potencies ranging from 3X, up to CM and LM, a wide variety of ointments and research based specially developed formulations, in liquid and tablet form, backed by extensive clinical trials.

Other products range includes Bio-Chemic salts and Bio-Combinations, eye-care, ear care, and cosmetic range like toothpaste, hair oil & shampoo, soaps, beauty cream etc..

SBL Pvt. Ltd. continues to abide by the corporate motto: Excellence at no extra cost.

Purity

from plant to mother tincture

SBL maintains quality standards in preparation of mother tinctures by following SOP (Standard Operating Procedures) at every stage of processing.

➤ Raw materials required for making Mother Tinctures are

□ Pure herbs

□ Purest ENA(Extra Neutral Alcohol)

□ Demineralised water

➤ Herbs are selected at specific time when they are rich in their active constituents. Such plants which are cultivated without the use of fertilizers or pesticides ensures **High grade raw material** and **Bio-availability of active substances**.

➤ SBL is one of the very few companies in the world which subjects every herb to **Colour reaction, UV test** and **High Performance Thin Layer Chromatography (HPTLC) system**. HPTLC plays a major role in analysis of Mother Tinctures as it allows for the qualitative and quantitative assessment of phytochemicals.

➤ The moisture in Herbs is determined by **Electronic Infrared Moisture Analyzer** and graded as per H.P.I standards to give the right balance between moisture and menstruum.

➤ The graded herbs are macerated for at least 3 weeks in mixture of **Extra Neutral Alcohol** and **Demineralised Water** in stainless steel containers.

➤ The macerated residue is pressed by heavy **Hydraulic Presses made of High Grade Stainless Steel**.

➤ To ensure maximum extraction, the application of pressure is varied from herb to herb, **an exclusive practice at SBL**.

➤ **Filtration of the extracted herbs** is done to check any impurity from passing on to next stage. Based on the intrinsic properties, a few herbs are also subjected to vacuum filtration.

➤ Equipments like bottles, tubes, micropipettes are first cleaned with Demineralised water and then dried in oven for one hour at 150°C before use.

➤ The mother tinctures are packed in Neutral Glass Bottles.

➤ Prepared under strict quality control measures, SBL'S mother tinctures are the most effective and reliable tinctures available in market.

The highest therapeutic efficacy and time stability are hallmarks of SBL'S Mother Tinctures.

The selection of plants and their parts is done at a specific times when they are rich in active constituents.

The High Performance Thin Layer Chromatography equipment for qualitative & quantitative analysis

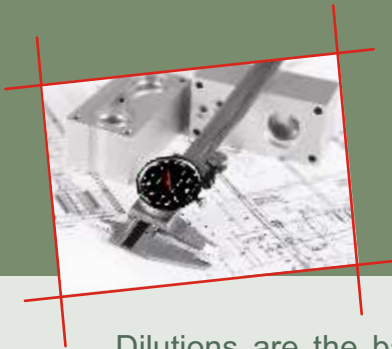

Infrared Moisture Analyzer helps to analyse the moisture in herbs

Heavy stainless steel hydraulic press for optimum extraction of the macerated residue.

SBL offers 400 varieties of Mother Tinctures.

Precision

quality associated with SBL's Dilutions

Dilutions are the back-bone of Homoeopathy and the curative power of medicines depends not only on the prescriber but also on the genuineness of the prescribed medicine. Therefore SBL ensures quality of dilutions by taking elaborate measures.

- The back potencies used for preparation of Dilutions are made from high quality mother tinctures prepared at SBL.
- Back potencies are dynamised with exact measures of ENA, in its purest form.
- SBL is the only company using **Patented Computerized Potentiser**, an accurate device to ensure uniform and vigorous succussion to each potency.
- SBL uses imported **Millipore Micron Filter**, which filters up to 0.2 microns. This ensures that there are no impurities or contamination in the ENA.
- **Laminar Flow Workstation** ensures that dilutions are filled in non contaminated environment. This technique ejects continuous purified air filtered through pores of 0.3 microns hepafilters, ensuring a non contaminated environment.
- Dilutions are filled in non reactive neutral glass bottles, washed with demineralised water and dried at high temperature (150°C).

Meticulous attention to inputs processes, testing, and packaging ensures that SBL Dilutions deliver the maximum therapeutic value.

Computer controlled potentiizer to ensure uniform percentage of medicament in each drop.

The imported 0.02 Millipore Micron Filter used to avoid any kind of impurities and contamination.

Laminar Flow Workstation ensures that dilutions are filled in non contaminated environment.

SBL offers more than 1000 Dilutions in various potencies (3X, 6X, 3, 6, 12, 30, 200, 1M, 50M, CM)

Perfection

at every stage for making tablets

(Triturations, Bio-chemicals, Bio-combinations and Speciality products)

SBL adheres to immaculate quality control measures in manufacturing of tablets also.

- The lactose used for making triturations are of **purest grade HMS lactose**, imported from Holland, which is further tested to confirm to HPI standard for purity at SBL Quality Control Labs.
- Additional identification test of lactose is conducted by measuring **Light Absorption and Specific Optical Rotation through Polarimeter**.
- **Cell salts (12 biochemic salts)** are manufactured by many companies. However, SBL has shortlisted the 3 top companies of international standards for supply of these cell salts.
- **Uniform dispersal of medicament** in tablets is ensured through proper trituration of the salts in right proportion.
- The drying temperature as well as the pressure of the tableting machine has to be controlled and adjusted so that the final product meets the standards of tablets as laid down in HPI. The tablet should neither be too soft nor too hard and of uniform weight for optimum efficacy.
- In each batch the tablets are tested for optimal
 - Disintegration time (DT)
 - Hardness
 - Average weight
 - Weight variation
 - Friability
- Tablets are finally packed in neutral glass bottles by automatic filling machine untouched by hand.

The tablets thus produced have high therapeutic efficacy because SBL tablets are made as pure and as perfect as possible.

SBL's uses purest form of Lactose imported from Holland

Polarimeter helps to test purity of Lactose

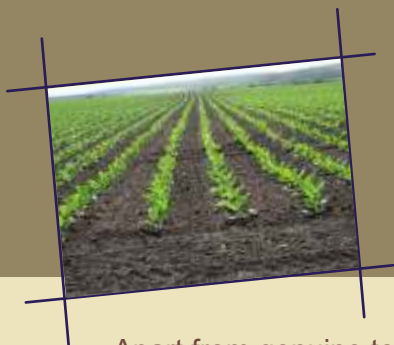

Trituration method to ensure uniform distribution of medicament in each tablet.

Automatic tablet making machines for uniform size & strength.

Bio-Chemicals from 3x to 200x potencies & Bio-Combination from 1 to 28.

Uniformity of medicament in Pomades/Gel

Apart from genuine top quality raw materials, the efficacy of ointments depends on:

- The medium used for controlled rate of absorption of the active medicines in ointment through the skin.
- The manufacturing process, to ensure that the active ingredient is uniformly & homogeneously distributed in every portion of ointment.
- **Raw materials** used for manufacturing are:
 - Bees wax
 - Lanolin
 - White Petroleum Jelly
 - Liquid Paraffin Heavy (LPH)
- With the ordinary **process of manufacturing** of ointment (with standard ordinary equipments) it is practically impossible to ensure the availability of active ingredients uniformly and homogeneously in every portion of ointment.
- The active ingredient in SBL'S range of ointments varies between 4 to 10 percent. These active ingredients have to be not only "Pure & Perfect", but their presence in the ointments has to be uniform.
- SBL uses a special **homogenizer** (designed by Boiron Laboratories) to make sure of uniform & homogeneous dispersion of the active ingredients in every part of ointment.
- SBL manufactures ointments either in gel form or cream form.

Thus SBL manufactures the best homoeopathic ointment in the market.

Ointment/gel is the medium used for controlled rate of absorption of medicament through skin.

Uniform mixing of medicament in homogenizer.

Ointment homogenizer for uniform and homogenous dispersion of active ingredients in every part of ointment.

Composition: 10% Jaborandi extract in oil base Directions for use: Massage the oil into scalp with fingertips and leave overnight, wash next day. Use as a regular hair oil.		

BIO-CHEMICS

The body is made of cells. Different kinds of cells build different tissues and organs. The difference in cells is mainly due to difference in cellular constituents where inorganic salts play an important role. In 1873 W.H. Schussler identified 12 such salts and any change in quantitative relations disturbs normal cell function and causes disease. These are remedied by the appropriate bio-chemic or bio-combination.

REMEDY	GENERAL INDICATION
Calcarea Fluorica	Varicose veins, piles, cataract, gumboils, arteriosclerosis
Calcarea Phosphorica	Dentition, growth supplement for children, puberty, pregnancy, old age, fractures
Calcarea Sulphurica	Cystic tumours, fibroids, hastens suppuration, eczema
Ferrum Phosphorica	Anaemia, feverish condition, catarrhal condition of respiratory tract
Kali Muriaticum	Controls affections of middle ear, throat, glandular inflammation
Kali Phosphorica	Prostration, weakness and exhaustion, mental and physical weakness, back pain, depression, sleeplessness, examination fear
Kali Sulphuricum	Catarrh with yellow discharge (bronchitis, pharyngitis, chronic supp. otitis media), itching of skin & seasonal rashes
Magnesium Phosphorica	Muscular pains, cramps, convulsions, flatulent colic
Natrum Muriaticum	Intermittent fever, sun-stroke, headache, toothache, stomach-ache, diabetes
Natrum Phosphoricum	Sour eructations & vomiting, heartburn, indigestion with acidity, nocturnal enuresis
Natrum Sulphuricum	Gastric biliousness, liver diseases, uric acid diathesis
Silicea	Growth disturbances of hair, nails, diseases of bones, caries, skin does not heal easily, weeping eczema, pyorrhea

have assured therapeutic efficacy & high quality**

BIO-COMBINATIONS

SBL offers conventional range of 28 Bio-combinations, made with its high grade Bio-chemicals.

DISEASE

Bio-Combination No. : 1

ANAEMIA

Indications : Anaemia due to continuous loss of blood from any part of the body. A general wasting of tissues. Children with poor digestion.

Bio-Combination No. : 2

ASTHMATIC CONDITIONS

Indications : Bronchial asthma with yellow sputum, worse in the evening. Asthma accompanied by cough or troublesome flatulence. Asthma aggravated by food or exertion.

Bio-Combination No. : 3

COLIC

Indications : Intestinal pain relieved by pressure, flatulent colic, colic due to inflammatory conditions and colic in children during teething or due to flatulence or constipation.

Bio-Combination No. : 4

CONSTIPATION

Indications : Bowels constipated without apparent cause. Dry, hard, dark coloured stool associated with dull headache, foul breath, coated-tongue, torpid liver. Alternate diarrhoea and constipation.

DISEASE

Bio-Combination No. : 5

CORYZA (Nasal Discharge)

Indications : Coryza with headache & sneezing. Continuous thick, white discharge from the nose or bronchial tubes due to inflammation of the mucous membranes.

Bio-Combination No. : 6

COUGH, COLD & CATARRH

Indications : Acute febrile catarrhal conditions, headache, painful respiration, bronchitis, rattling cough.

Bio-Combination No. : 7

HIGH BLOOD SUGAR

Indications : Increased micturition, excessive thirst & dryness, cramps, prostration & sleeplessness. Helps better assimilation of glucose. Kidney & liver functions are also improved.

Bio-Combination No. : 8

DIARRHOEA

Indications : Thin, watery stools with undigested food. White coated tongue. Loose morning stools which are at times involuntary while passing flatus.

**SBL's Bio-chemicals & Bio-combinations
have assured therapeutic efficacy & high quality**

BIO-COMBINATIONS

DISEASE

Bio-Combination No. : 9

DYSENTERY

Indications : Stool with mucus and blood and also for stools like rice water. For inflammation of intestines with low grade fever with constant urge to empty bowels.

Bio-Combination No. : 10

ENLARGED TONSILS

Indications : Inflamed tonsils, follicular tonsillitis, painful with white coating or greyish white patches on tongue or tonsils, bad breath with loss of or lowered appetite.

Bio-Combination No. : 11

PYREXIA

Indications : Febrile conditions associated with initial inflammatory conditions like chill, sudden rise in temperature and in conditions that tend towards suppuration. It generally covers all mild febrile conditions.

Bio-Combination No. : 12

HEADACHE

Indications : Headache due to sun heat, headache due to congestion, over exertion, lack of sleep, or because of low functioning liver. Nervous headache due to stress, worries & anxiety.

DISEASE

Bio-Combination No. : 13

LEUCORRHOEA

Indications : All forms of leucorrhoea, like white of an egg, acrid & watery. Leucorrhoea during puberty, pregnancy & climacteric, in states of general weakness.

Bio-Combination No. : 14

MEASLES

Indications : Sneezing and thin discharge from nose, eyes are watery, cough & febrile condition. It is a good help in all stages of the disease.

Bio-Combination No. : 15

IRREGULAR PERIODS

Indications : Irregular cycles, scanty and late in young women, early long lasting & profuse in elderly women. Dysmenorrhoea.

Bio-Combination No. : 16

NERVOUS EXHAUSTION

Indication : Extreme lassitude, depression, nervousness, irritability, confusion, sleeplessness, ill effects of grief, weakness of heart.

Bio-Combination No. : 17

PILES

Indications : Bleeding haemorrhoids, fissures, internal piles with backache. Helps in all kinds of piles, external piles with stinging pain, bleeding piles with or without pain.

**SBL's Bio-chemics & Bio-combinations
have assured therapeutic efficacy & high quality**

BIO-COMBINATIONS

DISEASE

Bio-Combination No. : 18

PYORRHOEA

Indications : Spongy and inflamed gums that bleed easily. Pus in gums, foul breath, toothache, teeth sensitive to cold and hot drinks.

Bio-Combination No. : 19

JOINT & MUSCLE PAIN

Indications : Joint and muscle pains with or without inflammation, stiff neck, shoulder pains, writer's & player's cramps, lumbago & sciatica.

Bio-Combination No. : 20

SKIN DISEASES

Indications : Acne, chaps and cracks, whitlow, eczema, eruptions on the scalp, seborrhoea, psoriasis, herpes and similar eruptive diseases. It is also indicated in post-operative adhesion and syctic excrescences.

Bio-Combination No. : 21

TEETHING TROUBLES

Indications : Tardy dentition. Children who are crying, obstinate, peevish during dentition. Improves appetite and digestion, thus helps to build the body.

DISEASE

Bio-Combination No. : 22

SCROFULA

(Enlarged Glands)

Indications : It almost covers all symptoms of both dry and suppurating scrofulous glandular abscesses. It also covers acne, erythema and vesicles containing a thick white Content.

Bio-Combination No. : 23

TOOTHACHE

Indications : Neuralgic pain or toothache due to unnatural loosening of teeth. It checks swelling and bleeding of gums and strengthens teeth in their sockets.

Bio-Combination No. : 24

DEBILITY & EXHAUSTION

Indications : Wasting diseases, anaemia, general debility, exhaustion, lack of vitality. For women weakened by frequent child bearing.

Bio Combination No. : 25

ACIDITY, FLATULENCE, INDIGESTION

Indications : Gastric disturbances, hyperacidity, sour eructations, flatulence, flatulent colic, dyspepsia, bilious vomiting with associated headache in such conditions. It is also indicated in heartburn and jaundice.

**SBL's Bio-chemics & Bio-combinations
have assured therapeutic efficacy & high quality**

BIO-COMBINATIONS

DISEASE

Bio-Combination No. : 26

EASY PARTURITION (Easy Delivery)

Indications : If taken during the entire pregnancy, it helps relieve labour pains and promotes easy delivery. Improves health of mother and assists development of the child.

Bio-Combination No. : 27

LACK OF VITALITY

Indications : Lack of vitality, general debility, weakness, nocturnal emissions, Nervousness.

DISEASE

Bio-Combination No. : 28

TONIC

Indications : Helpful in persons suffering from consumption & wasting diseases. During convalescence builds up entire system by providing necessary tissue nutrition, improves resistance to disease.

Pack size : 25gm and 550gm.

Contra-Indications : No known contraindications.

Usage : Can be used with Homoeopathic medicine.

Dosage : Adults: 4 tablets, every three hours or four times a day.

Children: Half of the adult's dose

	: Lymphocytes : 20-45% (1500-4000/Cumm.)
	: Monocytes : 02-10%(200-800/Cumm.)
	: Eosinophils : 01-06% (40-400/Cum.)
	: Basophils : 1% (20-100/Cumm.)
Platelet Count	: 1.5 Lakhs - 4 Lakhs/Cumm.
Reticulocyte Count	: 0.5- 2.5 %
B.T.	: 2.5-9.5 Minutes (Template Method)
C.T.	: 5-11 Minutes
ESR	: Westergren Method (Upper Limits)
Men	: 17-50 Yrs. :- 10 mm.
	: > 50 years :- 12-14 mm.
Women	: 17-50 Yrs. :- 12 mm.
	: >50 Yrs. :- 19-20 mm.

QUALITY OF SUGAR GLOBULES

In India most of the sugar globules are manufactured from plain cane sugar. When dilution with high concentrate of alcohol is poured in such globules, there is a tendency of the globules getting dissolved-partly or wholly.

As far as possible please use globules made from pure lactose or from pharma grade sugar.

METHOD OF POURING

- The dilutions should not be poured over the sugar globules. It should be poured around the inside neck of the bottle containing the globules.
- The bottle should be mildly shaken immediately, so that the dilutions spread over all the globules as uniformly as possible.
- Dilutions more than the required quantity should not be used, as such excess quantity of dilutions can dissolve the sugar Globules.
- The standard quantity of dilutions to be used in a bottle containing 1-2 drams of sugar globules is 4-5 and 7-8 drops respectively.
- Please explain this important aspect to the Assistants/ Compounders working with you.
- The precaution would help in uniform spread of dilution and prevent the globules from dissolving so as to give better results with your proven skills.
