B.JAIN Group of Companies

Dear Doctors,

B.JAIN Group has been serving homeopathy for more than 50 years. It was started with a small publishing house in 1966 to serve passionate practitioners, ambitious students & admirers of homeopathy around the world. It publishes books & homoeopathic journals, conducts seminars and workshops for students & doctors to exchange their ideas and experiences. Likewise for the promotion of Homeopathy across the globe.

After serving homeopathy in terms of printing I was not contented as a large sector of Indian homeopaths still direct their gaze toward medicines which are not manufactured in their own country. I strive to find the reason behind this. After having colloquy with plethora of doctors then I came to a conclusion that there is a need of quality medicine. To achieve this we need a dedicated team, appropriate infrastructure, best available raw material and transparency to carry out all the related procedures. This leads to the foundation of B.JAIN Pharmaceuticals in 2007. Today B.JAIN Pharmaceuticals is known for manufacturing one of the finest quality of homeopathic medicines.

In 2010, B.Jain was the first pharmaceutical company in Asia to invest for development and procurement of validated K-Tronic Potentiser, which makes potencies with highest precision. Our goal is to reach to the masses by maintaining quality and accuracy of product.

Till now, B.Jain is the first Asian homeopathic pharmaceutical to be NSF Pharmabiotech and rephine audited & complied. NSF is an accredited third part association. It checks compliance as per USFDA & Rephine Ltd is a UK based company that performs good manufacturing practice audits to ensure GMP compliance.. We are committed to quality at every step of the way.

Today, we continue our work in sourcing raw material from original source of cultivation or from reliable vendors. Raw materials used in B.JAIN are tested against various parameters. Special emphasis has been laid on cleanliness, maintaining ISO class 7 and class 8 environment, cleanrooms with HEPA filters and HVAC system.

The wide range we offer include mother tinctures, liquid dilution, LM Potency, Biochemic & Biocombination remedies, Trituration & 1x Tablets, lactose, globules, speciality products, personal care products and remedy kits. We are proud to be a part of growing homeopathic community. We export medicines to many countries.

We express our sincere gratitude to valued patients and learned doctors in addition to dealers who perform a wonderful task in conveying our basic objectives to last one in the queue.

Homoeopathy is passion for us and we are proud to be a part of flourishing homoeopathic society. To find more about our products & their preparation you can visit: www.bjainpharma.com.

CERTIFICATIONS

B. Jain Pharmaceuticals has set a benchmark by achieving GMP certifications from Indian Regulatory, Health Canada, USA third party audit & also a U.K based third party audit. B.Jain strives to take Indian homeopathy all across the globe.

GMP CERTIFIED

Good Manufacturing Practice (GMP) is a term that is recognized worldwide for the control and management of manufacturing, testing and overall quality control of pharmaceutical products. GMP addresses issues including documentation, record keeping, personnel qualifications, sanitation, cleanliness, equipment verification, process validation, and complaint handling.

ISO CERTIFIED

GMP is a product quality standard, with a focus on getting the right quality product to the only customer of GMP – the patient. ISO 9001 is more about running a whole business, a goal of which will be getting product of the right quality – but other aims are important too. Whilst GMP focuses on Production and Quality Control – ISO focuses on the all departments and processes of an organisation.

B.JAIN managed to attain ISO 9001:2008 certification awarded by the TUV NORD CERT certification.

NSF PHARMA BIOTECH AUDITED & COMPLIED

Another benchmark that B.Jain Pharmaceuticals set, is to be the first Asian Homeopathic pharmaceutical company to be NSF Pharma biotech audited & complied. NSF Pharma biotech is an accredited independent third party certification body. NSF Pharma biotech division conducts audits for pharmaceutical firm as per USFDA guidelines. It is one of the strictest audits for any OTC medicinal product to be sold in U.S, be it of allopathy, homeopathy, or any other science.

REPHINE AUDITED & COMPLIED

Rephine Ltd is a UK based company that offers specialist consultancy services to the pharmaceutical industries worldwide, performs good manufacturing practice audits to ensure GMP compliance. Rephine auditors carried out inspection at B. Jain's manufacturing site and qualified B.Jain to be capable of manufacturing medicines as per HPI, HPUS, EuPH & to be cGMP of highest standards.

OUR STRENGTHS

RESEARCH & DEVELOPMENT

The R&D Department at B.Jain Pharmaceuticals is one of the pillars for the quality we stand by.

B.Jain remedies

All the remedies which B.Jain adds to the list every year is prepared from herbs and chemicals which are procured from authentic sources. There are many remedies added which have been sourced from B.Jain own farm where herbs were grown in right environment and condition.

We access nosodes and sarcodes as well from reliable sources.

New Product Development

Each time a new product is developed there is a lot of literature research which goes behind it. Post that there is a sample product development at our formulation lab where samples are developed and sent for basic testing, once that is approved products are put under stability. Only when an accelerated stability report is cleared products are launched in the market. So each product coming out of B.Jain is a tried and tested which makes it efficacious and safe.

B.Jain has a capacity to develop new products based on this strong team of formulation and R&D. The team has scientists ,homeopathic doctors and pharmacist who contribute to this work.

QUALITY CONTROL

B.Jain pharmaceuticals has a well equipped quality control department which has an experienced team of chemists, botanists and expert technicians. The QC is outfitted with the most advanced machinery and equipment for testing the raw material and the finished product at various stages.

Raw material

All herbs and raw materials go through standardization tests. Well laid out procedures for herb testing includes studying organoleptic features, macroscopic & microscopic testing, TLC and UV.

These tests help the department to identify any spurious ingredient precisely. All the raw material are tested and approved prior to be used in production.

In process Quality Control (IPQC)

In-process controls play an especially important role in ensuring the consistent quality of products. Tests that are crucial for quality control but that cannot be carried out on the finished product shall be performed at an appropriate stage of production.

Finished Products

The QC department does test of sample of all batches of finished products for laid out parameters, specifications & microbiological testing. Only after the QC approval the product is released for dispatch.

Total solids in finished MT

Disintegration Time

MICROBIOLOGY

Control of the bioburden through adequate cleaning and appropriate storage of equipment which ensure that subsequent sterilization or sanitization procedures & achieve the necessary assurance of sterility.

QUALITY ASSURANCE

Quality Assurance is an additional step to ensure that all processes from receiving raw material, testing procedures, equipment & instrument, and their release are designed & implemented correctly as per laid down SOP's (Standard operating procedures).

QA keeps a constant check on various stages by everyday rounds and presence at critical steps.

QA also ensures that GMP guidelines are to be followed and record keeping of all processes is in place.

Visual Inspection

MOTHER TINCTURE

B.Jain Pharmaceuticals emphasize on quality of mother tincture because they are the groundwork in the manufacturing of dilution. The quality of medicine not only empowers the hand of physician but also the patient's faith in homeopathy will inflate.

Raw material

- The raw material is obtained from original source of cultivation or reliable vendor.
- Herbs and chemicals are strictly tested through the standard laid by HPI, HPUS, or GHP whichever is applicable.
- B.Jain uses highest grade of alcohol, grain based ENA to be used as a vehicle in the preparation of mother tincture.

Process

The manufacturing requires precise operations.

Step-1: Maceration/Percolation

The process of maceration/percolation is done as per pharmacopoeial guidelines or Hahnemannian procedure. Use of 316 grade SS (highest quality stainless steel) containers for all steps.

Step-2: Hydraulic Press

The resultant is pressed through the hydraulic press machine to obtain the maximum medicament in the tincture.

Step-3: Filtration

Under gravity filtration is done by using Whatman membrane Filter paper.

Step-4: Ageing

The highlight of B.Jain MT is the Ageing process to ascertain maximum dissolution of drug substance into the menstrum (alcohol), removing all sediments thus releasing all medicament quality into the alcohol and gives a pure and clear MT.

Step-5: Second level Filtration

Step-6: QC Testing

All MT undergoes tests and analysis as per specifications laid out in standard. Once tincture clear and passes all criterion of testing are released for dispatch.

To ensure the consistency and assurance of procedures carried out, all steps are carried out for each production are documented and checked by QA.

LIQUID DILUTIONS (POTENTISED MEDICINES)

Raw material

- From the genuine mother tinctures prepared in house which assures the quality
- Grain based ENA is used as a vehicle

Process

- Prepared from latest and validated K-Tronic Potentiser which is checked and calibrated online by the parent company.
- K-Tronic Potentiser is the one which assures 99.6% accuracy.

Back Potencies

- All back potencies are prepared in-house.
- For scarce raw material back potencies are imported from reliable European sources with certifications.

Documentation

All steps of potency preparation from raising back potency to final potency, labeling, packaging are documented.

Range, Stocking and Packaging

- We maintain stock of fast moving dilutions for quicker processing
- For medicines which are less in demand, back potencies are kept ready at all times and high potencies are made on order in minimum time.

Packing Material

- Amber coloured bottles to ascertain the best quality neutral bottles for maintaining the purity of medicines.
- Cleaned by three level of washing and dried to ensure they are free from all impurities.

TABLETS

Raw Material:

- The base of lactose which is used as a base is HMS GRADE lactose. The finest lactose considered as best in the world.
- All salts and raw material (medicament) used taken from approved vendor and chemical manufacturer of highest quality.

Process and Technique:

- The complete batch 1 hour trituration is carried out for all tablets made at B.Jain
- The mortar and pestle equipment used is made of porcelain as in time of Hahnemann
- Each step is carried out and validated by documented procedures

Quality control:

- All in process powders and final tablets are tested as per laid out standard and specification at QC Lab.
- All tablets are released after testing of all physical ,chemical and microbiological standard tests.

Special Features:

- Soft dissolving tablets
- Dissolution time of 10 -20 seconds for all biochemical salts.

HMS Lactose

Trituration in automated Mortar Pestle

Final tablets from Hi-tech Cadmach Machine

GLOBULES

MADE FROM PHARMACEUTICAL GRADE SUGAR

Features:

- Assures Homogenous impregnation of medicines
- Quality tests done for all batches
- Manufacturing jars of SS316 grade stainless steel
- Made in GMP certified environment

Pack Sizes available: 1 kg

Sizes available: 10 No., 20 No., 30 No., 40 No., 50 No. and 60 No.

Types available: Soft Globules, Hard Globules

BLANKETTES

MADE FROM PUREST QUALITY HMS LACTOSE

Features:

- HMS grade Lactose
- Optimal preparation method which assures fast dissolution in mouth (10-15 seconds)
- Tablet size – 100mg, 250mg

Pack Sizes available: 1 kg

WAREHOUSE/STORE

Warehouse/store is adequate with highest security standard & constant information sharing. Staff has the insight into the smallest components which determines the quality and efficiency of warehouse management.

Store is clean and uncluttered, having temperature and humidity control, enforcement of stock rotation, adequacy of shelving, quarantine area for recalled/expired medicines.

LM POTENCY

- Dr. Hahnemann discovered a new potency between 1837-1842, in Paris and named it as o Renewed Dynamization – Aphorism 161
o New Altered but Perfected Method – Aphorism 246 footnote
- Master Hahnemann designated as 0/1, 0/2...0/30
- The numerator '0' represents poppy sized globule which is used in every potentisation.
- Dr. Pierre Schimdt of Geneva gave this new scale another name – 50 Millisemal Potency/ Scale

Preparation of LM Potency at B.Jain Pharmaceuticals

- 1grain of drug substance + 100 grains of sugar of milk $\xrightarrow{\text{Trituration for 1hour}}$ 1st trituration
- 1grain of 1st trituration + 100 grains of sugar of milk $\xrightarrow{\text{Trituration for 1hour}}$ 2nd trituration
- 1grain of 2nd trituration + 100 grains of sugar of milk $\xrightarrow{\text{Trituration for 1hour}}$ 3rd trituration
- 1grain of 3rd trituration + 100 drops of dispensing alcohol + 400drops of purified water

Mother tincture of LM Potency

- 1drop of MT + 100 drops of pure alcohol $\xrightarrow{100 \text{ succussions}}$ 0/1
- 100 globules are taken and moistened with 1drop of the 0/1 potency and then dried on a blotting paper $\longrightarrow$ 0/1 potency in globules
- 1globule of previous potency dissolved in a drop of water $\xrightarrow{100 \text{ drops of alcohol} + 100 \text{ succussions}}$ 0/2

Why B.Jain LM?

- Assurance of Correct Raw Material
- Grain Based ENA used
- Pharma grade globules used – Most Accurate Vehicle
- Following complete Hahnemannian method to offer most accurate LM Potency
- Available in sealed packing of 6gm – Assuring hygiene/ confirming correct material.

Pack Size Available: 6gm
